NOTE:

- Weight capacity is 500 lbs.

1

Attach (2) table legs to (1) short frame by sliding the bracket into the short frame. Make sure the holes on the bracket and the short frame are aligned properly. Repeat step using the remaining table legs and short frame.

2

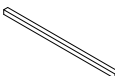

Secure the short frame to the bracket on the table leg by using (2) screws and lightly tighten. Repeat step as needed.

3

Attach the assembled table legs and short frames to the (2) long frames by sliding the brackets into the ends of the long frames. Make sure the holes on the brackets and the long frames are aligned properly.

TABLE OF CONTENTS:

	.....4X Table Leg
	.....2X Long Frame
	.....2X Short Frame
	.....16X 5/8" M8-1.25 Thread Flat Head Socket Screws
	.....1X Hex Key

4

Secure the long frame to the bracket on the table leg by using (2) screws and lightly tighten. Repeat step as needed.

5

Adjust all corners to make sure they are straight and correctly aligned before firmly tightening all screws. Flip table over and place in desired location.
