2.1 Achieving the Best Performance

To achieve the best performance:

- Use only good quality connection cables (we recommend high-performance, high-resolution cables) to avoid interference, deterioration in signal quality due to poor matching, and elevated noise levels (often associated with low quality cables)
- Do not secure the cables in tight bundles or roll the slack into tight coils
- Avoid interference from neighboring electrical appliances that may adversely influence signal quality
- Position your **PCS88-90 / PCS88-94** away from moisture, excessive sunlight and dust

This equipment is to be used only inside a building. It may only be connected to other equipment that is installed inside a building.

Do not place heavy objects on top of the **PCS88-90 / PCS88-94**.

2.2 Recycling Products

The Waste Electrical and Electronic Equipment (WEEE) Directive 2002/96/EC aims to reduce the amount of WEEE sent for disposal to landfill or incineration by requiring it to be collected and recycled. To comply with the WEEE Directive, we have made arrangements with the European Advanced Recycling Network (EARN) and will cover any costs of treatment, recycling and recovery of our branded waste equipment on arrival at the EARN facility.
