

1

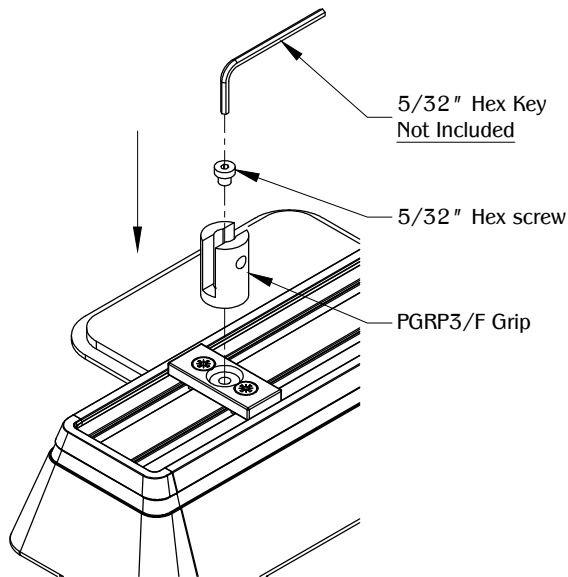

Determine desired location of Power Fence track on your surface. Place two T-nuts into the slotted track as shown.

2

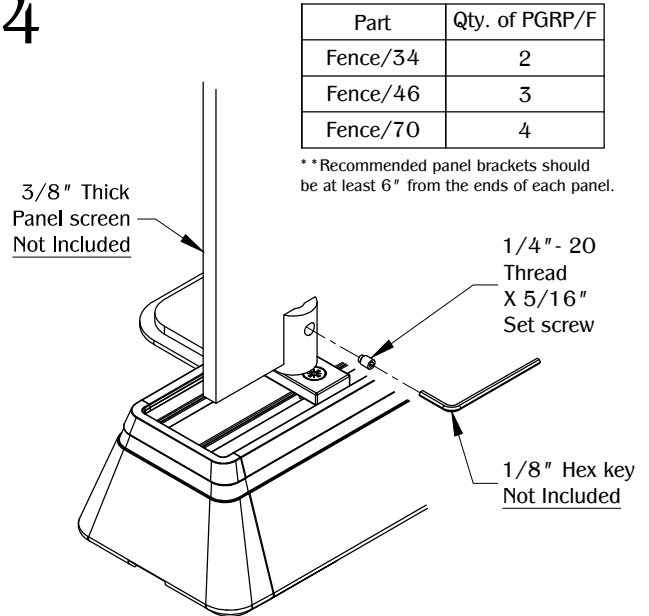

Align T-nuts with the PGRP3/F Base and secure in place using two countersunk machine screws.

3

Install PGRP3/GRIP into the center countersunk cavity on the PGRP3/F Base. Secure in place with the hex screw. Repeat Steps 1-3 for all other panel bracket sets as needed.

4

Secure panel in place by using the nylon-tipped set screw through the side of the PGRP3/F Grip as shown. Note: MAX panel height = 18".

Part	Qty. of PGRP/F
Fence/34	2
Fence/46	3
Fence/70	4

** Recommended panel brackets should be at least 6" from the ends of each panel.
