

NOTE:

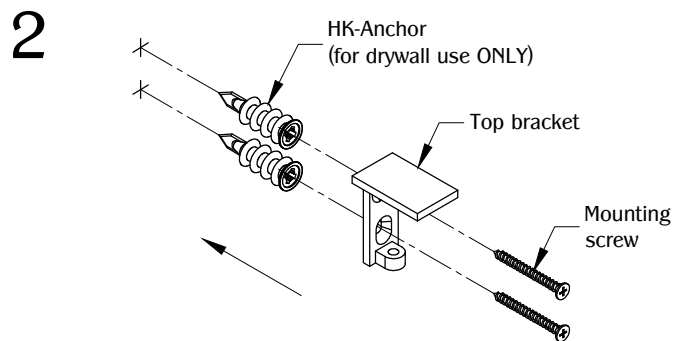

- Weight capacity is 25 lbs.
- Shelf projection is 8" MAX.
- Bracket spacing is 24" MAX.
- Shelf thickness is 8.00mm (5/16") MIN. to 32.00mm (1-1/4") MAX.

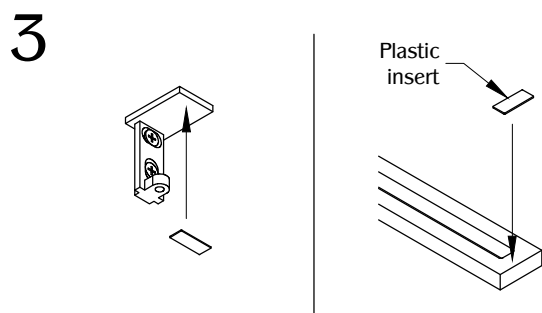

REAR VIEW

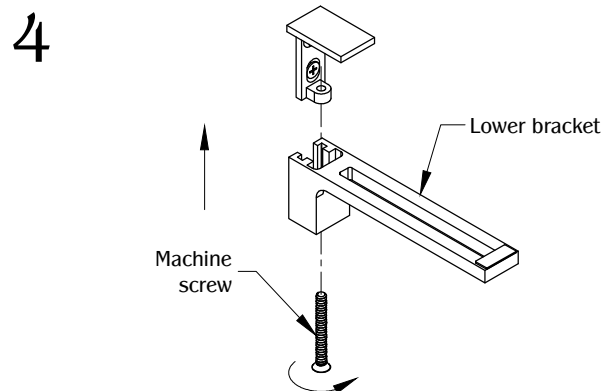

Determine the position and location of the part on the work surface. Mark the mounting positions for the mounting hardware.

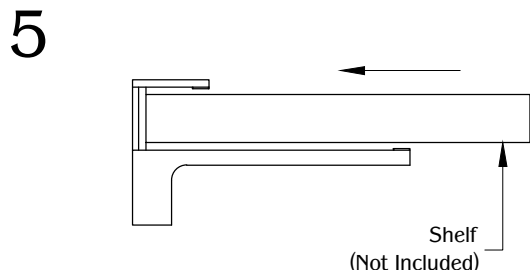

Install the top bracket of the SH48A. Make sure the part is leveled and aligned straight. Then, install the part with the mounting hardware.

Stick the (2) soft plastic inserts on the top front of the lower bracket and under the top front of the top bracket. (Note: Additional soft plastic inserts are provided but not required.)

Align the lower bracket to the top bracket. Secure the part with the machine screw.

Install the shelf to the SH48A by tightening the machine screw until the shelf is secure. (Note: DO NOT overtighten the machine screw.)
